New BvL silage block cutter features a robust frame and compact size of cut

The Megastar HD (heavy duty), the latest addition to the line of silage block cutters from BvL Maschinenfabrik, is especially suitable for front mounting.

Silage block cutters are among the flagship products offered by Bernard van Lengerich Maschinenfabrik GmbH & Co. KG (BvL) in Emsbüren. This tradition is continuously kept alive with new developments and optimization of the products of the V-LOAD silage block cutter series.

The latest addition to the series is the Megastar HD (heavy duty) cutter – as a variant of the previous block cutter models. What makes this silage block cutter unique:

- the compact size of the silage cut due to the short cutting bar (a feature of Megastar block cutters) – for increased access to fresh silage;

- improved stability due to the massive, reinforced frame (a feature of Master block cutters);
- the extra sturdy prong mount for the shorter, robust fork prongs.

This combination of features makes the machine ideal for front mounting and use with high silage blocks (e.g., when mounted on a telescopic handler). The compact block size also eliminates the danger of silage block overload.

Speaking of heights: For those who prefer a block cutter with a mast, the V-LOAD Megastar HD cutter also has this capability, thus allowing removal of silage at a height of up to 3.50 m.

Another new feature makes the machine even more user-friendly: All BvL silage block cutters of the Megastar, Master and Megastar HD series now have two extra lubrication points on the back of the front cutter – for convenient and consistent lubrication between the main frame and the cutter blade mount.

Discover the new silage block cutter and other products from the extensive range offered by BvL Maschinenfabrik at this year's AGRITECHNICA in Hanover. Visit us in Hall 21, Booth B18.

The new addition to the BvL silage block cutter series: the V-LOAD Megastar HD cutter.

The BvL Group is a family operated business, now in its fifth generation. The managing directors are Bernard van Lengerich and Bernhard Sievering, and the company headquarters is in Emsbüren in the Emsland region. The BvL Group has activities in three separate business divisions: Agricultural Machinery, Surface Finishing and Electrical Engineering.

In a nutshell, BvL stands for: Enthusiasm, Responsibility, and Passion!

Because with more than 160 years of experience, BvL is firmly established on the market as a dynamic, modern industrial enterprise with over 60 million euros in sales and about 400 employees.

An informal working atmosphere fosters flat hierarchies and an innovative team spirit. Personal contact and a positive communication culture have a long tradition at BvL.

Bernard van Lengerich Maschinenfabrik GmbH und Co. KG is among the world's leading manufacturers of feed technology solutions. In addition to feed mixing wagons, the product spectrum includes modern removal technology, spreading technology, biogas technology and digital products. Almost 70 percent of machine sales are generated abroad. The company's focus is on high standards of quality and custom tailored machines with a wide range of products, which is clearly reflected in the concept "Made for me!"
