CAMPAIGN 2023***

[BVL DIGITALLY SUPPORTS YOUR FEEDING PROCESS]

This user-friendly feed management system lets you manage feed components, animal groups, and loading and unloading programs via app or PC. Feed data is documented and stored in the cloud. Automatic real-time data synchronization is standard.

Documentation improves long-term control of your feeding process and increases loading precision as well as feeding accuracy.

All you need is a smartphone and the app.
Download, log in, and get started!

*With the purchase of a Bvl feed mixer wagon
