BvL feed mixer: 800 mm wide conveyor belts now standard

Custom tailored feed mixer wagons, with numerous feed discharge variants – that has long been the specialty of Bernard van Lengerich Maschinenfabrik GmbH & Co. KG. Now the feed technology specialists in Emsland are presenting a new standard for the optional transverse conveyors of their feed mixer wagons: Instead of 600 mm as in the past, they are now 800 mm wide, with an optimized frame. This applies to all feed mixers except the self-propelled V-MIX Fill Plus LS pro.

The wider conveyor belts significantly improve feed discharge efficiency. Lateral adjustment of the transverse conveyor is also available for this width. In addition, side elevators can be combined in different lengths. The new 800 mm transverse conveyor from BvL also retains the use of an open cage drum roller for reliable propulsion with no slippage.

If a narrower conveyor discharge is required, however, a 600 mm transverse conveyor belt for feed mixers is still available on request. This

may be necessary, for example, in combination with automated feed systems.

Would you like to learn more about BvL products or BvL Maschinenfabrik? Then have a look at: www.bvl-farmtechnology.com/en/

At this year's AGRITECHNICA you will also have the opportunity to visit us and see our products, in Hall 21, Booth B18.

Emsbüren, October 2023

Now standard in BvL feed mixer wagons: the transverse conveyor belt with a width of 800 mm.

The BvL Group is a family operated business, now in its fifth generation. The managing directors are Bernard van Lengerich and Bernhard Sievering, and the company headquarters is in Emsbüren in the Emsland region. The BvL Group has activities in three separate business divisions: Agricultural Machinery, Surface Finishing and Electrical Engineering.

In a nutshell, BvL stands for: Enthusiasm, Responsibility, and Passion!

Because with more than 160 years of experience, BvL is firmly established on the market as a dynamic, modern industrial enterprise with over 60 million euros in sales and about 400 employees.

An informal working atmosphere fosters flat hierarchies and an innovative team spirit. Personal contact and a positive communication culture have a long tradition at BvL.

Bernard van Lengerich Maschinenfabrik GmbH und Co. KG is among the world's leading manufacturers of feed technology solutions. In addition to feed mixing wagons, the product spectrum includes modern removal technology, spreading technology, biogas technology and digital products. Almost 70 percent of machine sales are generated abroad. The company's focus is on high standards of quality and custom tailored machines with a wide range of products, which is clearly reflected in the concept "Made for me!"
