Improved well-being and greater performance - cows love an evenly balanced mixture

Use the V-CONNECT Mixer Control by BvL to effortlessly prepare a consistent TMR feed mix

The same feed in the same blend every day and at the same time - this is exactly what ruminants want. Aside from keeping your animals healthy, this type of regularity will also boost their performance. Feeding according to the TMR principle has become common practice and is widely used in businesses of all magnitudes.

The task of preparing the TMR mix in the simplest way possible is made easier by working with machines and components that are perfect for the job. For quite a while now, BvL Maschinenfabrik GmbH & Co. KG has been offering the V-CONNECT Mixer Control, an accessory which can be used with all V-MIX mixer wagons as an electromagnetic control unit. Apart from showing the current mixing auger speed and mixing times, this digital system technology solution indicates the number of revolutions. This makes it possible for the user to ensure a consistent mixture and enjoy greater efficiency in time and cost as the auger will not complete more revolutions than necessary.

The digital module is easy to use for any farmer and can be purchased for every V-MIX mixer wagon made by BvL.

At the moment, the seasoned manufacturer from Emsbüren is including the V-CONNECT Mixer Control in the TMR package at half price for EUR 250. The offer is good from May 1 through July 31, 2021.

Preparing consistent mixtures is a cinch with the V-CONNECT Mixer Control.

The BvL Group has been owned and operated as a family-run business for five generations. The Managing Directors are Bernard van Lengerich and Bernhard Sievering, and the company's place of business is in Emsbüren in the Emsland region. The business activities of the Group are split into various areas of operation: Agricultural machinery, surface technology and electrical engineering.

The company acronym BvL epitomizes: **B**egeisterung, **V**erantwortung, **L**eidenschaft or Enthusiasm, Responsibility, Passion!

Its 160 years of experience have firmly established BvL in the marketplace and made it the dynamic and state-of-the-art industrial power house it is today, generating more than EUR 60 M in sales and operating with close to 400 employees.

Despite this phenomenal growth, the company has retained a family atmosphere that is distinguished by flat hierarchies and an innovative team spirit. Face-to-face interaction and a sound communication culture have a proud and long tradition at BvL.

Bernard van Lengerich Maschinenfabrik GmbH und Co. KG is one of the world's leading manufacturers of superior feeding equipment solutions. Aside from feed mixer wagons, the product portfolio comprises highly advanced unloading technology, bedding technology, biogas equipment and digital products. The company generates nearly 70 percent of their machine sales abroad. It attaches paramount importance to satisfying the highest quality standards and manufacturing a comprehensive selection of products that fit the customer's needs like a glove and embody a "Made especially for me!" concept.
