BvL: V-CONNECT Mixer Control for a better overview during feeding

- Equipment for the feed mixers of the Bernard van Lengerich Maschinenfabrik enables the display of mixing times and mixing speeds.

The Bernard van Lengerich Maschinenfabrik GmbH & Co. KG (for short: BvL) from Emsbüren offers an exciting addition to equipment options for the V-MIX mixer wagons: the digital display „V-CONNECT Mixer Control“. This can be installed as an accessory for the electromagnetic operation of the machines.

The farmer can use the Mixer Control to display and control mixing times and the display of the total revolution as well as mixing auger speeds in rpm. An operating hours counter is also integrated.

All this means real support in daily feeding work on the farm.

For example, the data makes it easier for the farmer to always produce constant feed mixtures, he always has constant and easier to understand mixing processes.

The easy-to-use, digital display is also available as a retrofit kit for each of the BvL V-MIX mixer wagons.

For more information on BvL's feeding equipment and all other products made by the company, log on to: www.bvl-farmtechnology.com/en

Emsbüren, in July of 2020

Caption:

The "Mixer Control" digital display of BvL is built into the electrical operation of the mixer wagon. This shows the mixing times and speeds of the mixing screws.

The display shows: the mixing time at the top, the mixing speed in revolutions per minute at the bottom left and the total number of revolutions at the right.

The BvL Group has been owned and operated as a family-run business for five generations. The Managing Directors are Bernard van Lengerich and Bernhard Sievering, and the company's place of business is in Emsbüren in the Emsland region. The business activities of the Group are split into various areas of operation: Agricultural machinery, surface technology and electrical engineering.

*The company acronym BvL epitomizes: **B**egeisterung, **V**erantwortung, **L**eidenschaft or Enthusiasm, **R**esponsibility, **P**assion!*

Its 150 years of experience have firmly established BvL in the marketplace and made it the dynamic and state-of-the-art industrial power house it is today, generating approx. EUR 55 M in sales and operating with more than 400 employees.

Despite this phenomenal growth, the company has retained a family atmosphere that is distinguished by flat hierarchies and an innovative team spirit. Face-to-face interaction and a sound communication culture have a proud and long tradition at BvL.

Bernard van Lengerich Maschinenfabrik GmbH und Co. KG is one of the world's leading manufacturers of superior feeding equipment solutions. Aside from feed mixer wagons, the product portfolio comprises highly advanced unloading technology, bedding technology, biogas equipment and system technology. The company generates more than 60 percent of their sales abroad. It attaches paramount importance to satisfying the highest quality standards and manufacturing a comprehensive selection of products that fit the customer's needs like a glove and embody a "Made especially for me!" concept.
