## **BvL V-CONNECT Dairy Feeder: now with both Wi-Fi and Bluetooth connectivity**

The V-CONNECT Dairy Feeder – the feed management system from Bernard van Lengerich Maschinenfabrik GmbH & Co. KG (BvL) – has repeatedly proven to be a competent digital helper in the stable. Product management has now added another practical feature to the application: In addition to Wi-Fi, the feed and weighing data can now be transmitted between the transceiver box on the feed mixer wagon and a mobile end device via Bluetooth.

Users can therefore choose whether to connect their end device via Wi-Fi – which is even possible with multiple mobile devices – or a Bluetooth connection, independent of network availability. A stable connection is thus assured at all times. The separate Bluetooth connection also allows parallel use of the Dairy Feeder cloud via the local Wi-Fi connection. Another advantage is the elimination of a SIM card, which would involve additional costs.

The BvL team will demonstrate the features of the V-CONNECT Dairy Feeder and other products for feeding, removal, and bedding technology at this year's AGRITECHNICA in Hanover, in Hall 21, Booth B18.

The choice of Wi-Fi or Bluetooth is now possible with the V-CONNECT Dairy Feeder from BvL.

*The BvL Group is a family operated business, now in its fifth generation. The managing directors are Bernard van Lengerich and Bernhard Sievering, and the company headquarters is in Emsbüren in the Emsland region. The BvL Group has activities in three separate business divisions: Agricultural Machinery, Surface Finishing and Electrical Engineering.*

*In a nutshell, BvL stands for: Enthusiasm, Responsibility, and Passion!*

*Because with more than 160 years of experience, BvL is firmly established on the market as a dynamic, modern industrial enterprise with over 60 million euros in sales and about 400 employees.*

*An informal working atmosphere fosters flat hierarchies and an innovative team spirit. Personal contact and a positive communication culture have a long tradition at BvL.*

*Bernard van Lengerich Maschinenfabrik GmbH und Co. KG is among the world's leading manufacturers of feed technology solutions. In addition to feed mixing wagons, the product spectrum includes modern removal technology, spreading technology, biogas technology and digital products. Almost 70 percent of machine sales are generated abroad. The company's focus is on high standards of quality and custom tailored machines with a wide range of products, which is clearly reflected in the concept "Made for me!"*
