BvL: New compact size variant with three mixing augers

The new V-MIX Plus 32-3S mixer wagon from BvL features a large volume capacity in a compact design.

A new model on the occasion of the company's anniversary: For exactly 20 years now, Bernard van Lengerich Maschinenfabrik GmbH & Co. KG (BvL) has been manufacturing feed mixer wagons with three mixing augers. Now BvL is launching a new variant: the V-MIX Plus 32-3S. In addition to a large mixing volume capacity of 32 m³, it also features compact dimensions. Because the base plate has a width of only 2.20 m, the new mixer wagon is available with an overall width of 2.27 m. Despite its large volume, it is therefore quite maneuverable and can easily fit through narrow passages. Another advantage of the compact design: it can be registered for road use with discharge chutes on both sides, without special approval. The standard 4-spring tandem axle unit ensures outstanding road behavior.

In addition, the relatively narrow container makes the mixer wagon an exceptionally lightweight and efficient machine.

With a base plate width of 2.20 m, this mixer wagon from the Emsbüren-based machine manufacturer fills a gap in the three-auger mixer product range. In addition to the 32-3S, the line also includes variants with 30 (30H-3S) and 34 m³ (34-3S).

As with all feed mixer wagons from BvL, this three-auger mixer wagon is also available with custom features and options, such as container linings, mixer auger variants, diverse discharge openings, weighing and camera systems, as well as electric control units.

Three-auger mixer wagons from BvL are also available in wider versions with a capacity of 30 to 40 m³, as well as high-performance Giant versions with a volume of up to 46 m³.

The new, compact three-auger V-MIX Plus 32-3S feed mixer wagon from BvL is a new addition to the product line of the feed technology specialist from the Emsland district.

The BvL Group is a family operated business, now in its fifth generation. The managing directors are Bernard van Lengerich and Bernhard Sievering, and the company headquarters is in Emsbüren in the Emsland region. The BvL Group has activities in three separate business divisions: Agricultural Machinery, Surface Finishing and Electrical Engineering.

In a nutshell, BvL stands for: Enthusiasm, Responsibility, and Passion!

Because with more than 160 years of experience, BvL is firmly established on the market as a dynamic, modern industrial enterprise with over 60 million euros in sales and about 400 employees. An informal working atmosphere fosters flat hierarchies and an innovative team spirit. Personal contact and a positive communication culture have a long tradition at BvL.

Bernard van Lengerich Maschinenfabrik GmbH und Co. KG is among the world's leading manufacturers of feed technology solutions. In addition to feed mixing wagons, the product spectrum includes modern removal technology, spreading technology, biogas technology and digital products. Almost 70 percent of machine sales are generated abroad. The company's focus is on high standards of quality and custom tailored machines with a wide range of products, which is clearly reflected in the concept "Made for me!"
